Strategic Selection Fund Enhanced Equity Exposure A CHF Hedged

Marketing Document for investors

Investment strategy

Enhanced Equity Exposure (EEE) is a long only UCITS open-end fund incorporated in Luxembourg. The Fund mainly invests in and gains exposure to the developed markets of Europe and North America. The fund's investment process is driven by stock specific fundamental analysis. Hedging strategies are implemented to reduce volatility.

*** The High Water Mark model is used to calculate the performance fees. The Performance Fee Period is yearly, ending on the last Valuation Day of each calendar year. The Performance Fee is payable yearly in arrears out of the Sub-Fund's assets. The Performance Fee will be equal to 15% of the positive difference between the Net Asset Value per share and the High Water Mark.

Legal notice

Strategic Selection Fund SICAV is a Luxembourg-registered "Société d'Investissement à Capital Variable" organised under Luxembourg Law and European Council Directive 2009/65/EC of 13 July 2009 (UCITS) and regulated by the "Commission de Surveillance du Secteur Financier" (CSSF), the Luxembourg financial services authority. Past performance of any investment is not indicative of future performance as the net asset value of the portfolio depends on market movements. This information does not constitute an offer to anyone, or a solicitation by anyone, to subscribe for shares of Strategic Selection Fund SICAV. Nothing in this information should be construed as advice and is therefore not a recommendation to buy or sell shares. Subscriptions for shares of the Company can only be made on the basis of its latest Key Investor Information Document and Prospectus together with the latest audited annual report, copies of which can be obtained, free of charge, on www.ecp.lu or by contacting European Capital Partners (Luxembourg) S.A., from the local representatives, information agents or distributors.

The portfolio holds investments denominated in foreign currencies. Please note that foreign currency exposure is not hedged. As a result, fluctuations in currency exchange rates between the foreign currencies and the base currency of the portfolio may significantly impact the portfolio's performance. Investors should be aware that both favourable and adverse movements in exchange rates can occur, potentially increasing the volatility and risk associated with the portfolio's returns. We encourage investors to carefully consider this foreign currency risk as part of their overall investment decision-making process.
